

# Rochester Intermodal Transportation Center Scoping Study

## Public Information Meeting

On behalf of the City of Rochester in cooperation with the Federal Railroad Administration and the New York State Department of Transportation (NYSDOT), we invite you to attend a second public information meeting for this study.

### Please join us.

The objective of this public meeting is to present the draft findings of the scoping study and solicit feedback from the public.

### What's a scoping study?

A scoping study explores the range of natural and community resources near a proposed new facility and examines the possible effects to those resources of building the project as well as the range of things to consider during facility design.

The end product of this study will be a report that lays the foundation for final design, construction, and occupancy of a new Intermodal Transportation Center. This new Center is expected to catalyze development in and around the site, while enhancing the public transportation experience of those who live, work, and visit in the City of Rochester.

### Learn more in advance.
